Welcome to the Deming Fire Department Knox Box program!

It is important that emergency response personnel have clear access to fires and medical incidents. In the event of a fire or life-threatening medical emergency, fire personnel must be able to reach the scene as quickly as possible and gain access to the home where a victim might not be able to open a door due to age or disability. In a true emergency, a few seconds literally can mean the difference between life and death. How quickly crews can begin fighting a fire or dealing with a medical emergency will often be determined by how successful they are in reaching the incidents in a timely manner.

The Knox Box program is designed to give Fire Fighters and EMT's quicker access to victims during times of emergencies, for more information on the Knox Box program please click on the link below for information on participating in the program call the Deming Fire Department at 546-8848 ext. 164
